SUMMARY

Security-focused IT professional (B.S. Computer Science, Cybersecurity concentration) with hands-on experience in SIEM and log analysis, MDM administration (Microsoft Intune, Windows Autopilot, Esper), and Windows endpoint deployment. ISC2 Certified in Cybersecurity and Google Cybersecurity certified; CompTIA A+, Security+, and TryHackMe SOC Level 1 in progress.

CERTIFICATIONS

- ISC2 Certified in Cybersecurity (CC) — November 2024
- Google Cybersecurity Professional Certificate — September 2025
- CompTIA A+ (220-1201 / 220-1202) — In Progress
- CompTIA Security+ (SY0-701) — In Progress
- TryHackMe SOC Level 1 — In Progress

RELEVANT COURSEWORK

- Applied Cryptography
- Network Security
- Foundations of Cybersecurity
- Data Structures & Algorithms
- Artificial Intelligence
- Secure Software Development

TECHNICAL PROJECTS

Home SOC Lab (In Progress)

- Deploying and configuring Splunk to ingest and analyze logs from local machines and simulated attacks, integrating Sysmon telemetry for endpoint visibility.
- Building custom dashboards that visualize failed logins, suspicious IP addresses, and anomalous file activity, correlated against threat intelligence feeds.
- Configuring real-time alerting on critical events such as brute-force authentication attempts to strengthen detection and response capability.

AI-Powered Wildlife Monitoring System

- Designed and deployed a YOLOv8 object-detection model identifying 19 animal classes, trained in Python and optimized with ONNX for edge inference on a Raspberry Pi.
- Applied on-device AI security best practices, delivering fully offline functionality with zero external network dependencies.
- Standardized dataset labeling and documentation workflows to preserve data quality and reproducibility.

EDUCATION

Florida Atlantic University
Bachelor of Science in Computer Science | Concentration in Cybersecurity
2024

TECHNICAL PROFICIENCIES

- **Security & Monitoring:** Splunk, Sysmon, SIEM dashboards, log analysis, alert triage, threat detection, threat intelligence correlation
- **Systems & Endpoints:** Windows 10/11 administration, Microsoft Intune, Windows Autopilot, Esper MDM, Android Debug Bridge (ADB), system imaging, registry configuration
- **Scripting & Data:** Python, Bash, SQL, Git/GitHub, Microsoft Excel, data validation
- **Practices:** incident documentation, QA and validation processes, cross-functional and remote collaboration

Available upon request

PROFESSIONAL EXPERIENCE

Deployment Technician

GRUBBRR | January 2026 - Present

- Provision, image, and configure Windows-based POS endpoints across 8-10 enterprise deployments weekly (averaging 2 units per installation), using Microsoft Intune and Windows Autopilot for zero-touch enrollment.
- Administer MDM policy and enrollment across a multi-hardware kiosk fleet spanning Windows (Intune/Autopilot) and Android (Esper), including tenant administration and creation of repeatable deployment processes.
- Designed and delivered a USB-tethered ADB diagnostic appliance that preserves Android kiosk monitoring during network outages, restoring endpoint visibility when cloud MDM access goes blind.

Inventory Control Specialist

The Container Store | March 2025 - January 2026

- Conducted weekly audits and reconciliations of high-volume inventory data across multiple POS/WMS databases, detecting anomalies and data-integrity issues.
- Investigated trends and reporting errors, recommending corrective controls that improved overall data reliability.
- Collaborated cross-functionally to strengthen workflow traceability and record accuracy in a fast-paced operations environment.

Customer Experience Associate

The Farmer's Dog | October 2023 - August 2024

- Safeguarded customer PII within CRM platforms (Gladly), sustaining a consistent 90-95% QA score in a fully remote, metrics-driven environment.
- Identified and escalated recurring data inconsistencies across systems, driving process-improvement fixes.
- De-escalated complex customer issues while maintaining high accuracy and productivity standards.

Specialty Team Member

Whole Foods Market | October 2022 - July 2023

- Ensured compliance with operational and loss-prevention policies while supporting high-volume seasonal sales operations.
- Tracked inventory trends and maintained detailed records to support accurate reporting and audit readiness.
- Recognized for accuracy, organization, and professionalism, contributing to a 25% increase in specialty department sales.
